Allowable Subject Matter

1. Claims 3, 8, 13, 27-29, and 56 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 3, 8, 13, 27-29, and 56 teach the specific equation of $(\text{max}-\text{min})/(\text{N}-1)$ wherein N is the number of applications given a preference, min is the minimum icon size, and max is the maximum icon size. Nowlan discloses a minimum and maximum size for icons (fig. 8) but fails to provide a preference for the number equation as taught by the Applicant. McComb (U.S. Patent 6,111,573) teaches dynamic sizing according to content (col. 7, lines 10-20) but fails to provided a specific sizing formula as taught by the Applicant. Morgan teaches dynamically adding icons (col. 2, lines 35-42) and container control (col. 1, lines 45-50) but fails to teach icon sizing as taught by the Applicant. Grossman teaches icons disappearing and reappearing based on usage (fig. 8 and 10). Grossman can be interpreted as a type of growing and shrinking. Grossman fails to teach use of a maximum and minimum formula based on number of applications as taught by the Applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
